**R**oda computer GmbH expands its portfolio of high-availability military computer servers. This is achieved by adding the distribution rights for the products of WESTEK Technology Ltd. for the DACH countries Germany, Austria, and Switzerland. The companies, both offering some 30 years of experience with state-of-the-art, rugged and mobile IT solutions, started the cooperation in April 2016 in order to increase the success in more than 70 countries world-wide. Having in mind

applications in vehicles with high-resolution cameras and sensors, roda computer's CEO **Frank Scholz** stated; "The new rugged server version with four XEON multicore processors (4x10 cores) and up to eight Nvidia Titan X graphic boards defines a quantum leap in rugged mobile/deployable IT", with roda founder and CEO Martin Bertsch adding; "Our customers can now choose out of a complete, scalable, and modular range of rugged systems [...]."
